

NATIONAL COVID-19 LABORATORY
DEPARTMENT OF MICROBIOLOGY, R.G.M.C. C.S.M.H.
COVID 19 TESTING FACILITY: C. R. Wadia Dispensary, Thane 400601
Test Report

| | |
|---|---------------------|
| Date & Time of receipt of specimen (dd/mm/yyyy) | 03/06/2020 13:30 pm |
| Date and time of reporting (dd/mm/yyyy) | 04/06/2020 11:45 am |
| SPECIMEN DETAILS | Nasopharyngeal Swab |
| NAME OF QUARANTINE CENTER / HOSPITAL | BHAYANDER PADA |

| Sample ID | Patient Name | Age (Yrs) | Gender | Date of sample testing | SARS-CoV 2 |
|-----------|----------------------------------|-----------|--------|------------------------|------------|
| C6476 | MANSI DABHOLKAR C - 1706 | 25 | F | 04.06.2020 | Negative |
| C6477 | RAJAN DABHOLKAR C - 1707 | 63 | M | 04.06.2020 | Negative |
| C6478 | OVI VINEET MORE C - 915 | 5 | F | 04.06.2020 | Negative |
| C6479 | PRAMODINI DATTATRAY MORE C - 915 | 58 | F | 04.06.2020 | Negative |

Note: The results relate only to the specimens tested and should be correlated with clinical findings.
Interpretation guidance:-

- Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/any other health care facility affirming requirements of the case definition/s.
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease.
- The repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing if required.*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director General, ICMR
