| C21208    | GANPAT PADU ROTHE             | 75        | M      | 12.08.2020             | <b>Positive</b> |
| C21210    | KIYARA ANIL EGADE             | 2         | F      | 12.08.2020             | Negative        |
| C21211    | GEETA GAJANAN BANGAR          | 55        | F      | 12.08.2020             | Negative        |
| C21212    | CHENDRA BHUSEN RAUT           | 23        | M      | 12.08.2020             | Negative        |

**Note:** The results relate only to the specimens tested and should be correlated with clinical findings.  
**Interpretation guidance:-**

- Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/any other health care facility affirming requirements of the case definition/s.
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease.
- The repeat specimens may be considered after a gap of 2 – 4 days after the collection of the first specimen for additional testing if required.\*
- A positive alternate pathogen does not necessarily rule out either, as little is yet known about the role of coinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director General, ICMR
