| C5772     | JANABAI SHINDE 6141            | 48        | F      | 29.05.2020             | Negative   |
| C5773     | PREETI MISHRA 5907             | 32        | F      | 29.05.2020             | Negative   |
| C5774     | SANDHYA ASHTEKAR 6116          | 65        | F      | 29.05.2020             | Negative   |
| C5775     | DR . URVI WAGH 6265            | 25        | F      | 29.05.2020             | Negative   |
| C5776     | BHIMA KARCHANDI 5892           | 31        | М      | 29.05.2020             | Negative   |
| C5777     | MAHADEVI WALEKAR 5903          | 38        | F      | 29.05.2020             | Positive   |
| C5778     | VITHAL WALEKAR 5902            | 48        | М      | 29.05.2020             | Negative   |
| C5779     | AARTI NIGAM 6077               | 23        | F      | 29.05.2020             | Negative   |
| C5780     | SHREENATH MHATRE 6196          | 35        | М      | 29.05.2020             | Positive   |
| C5781     | TARABAI MHATRE 6197            | 59        | F      | 29.05.2020             | Negative   |
| C5783     | VILAS TOSKAR 6034              | 42        | М      | 29.05.2020             | Negative   |
| C5784     | RAJUBAI RAMSING SONAR<br>14053 | 65        | F      | 29.05.2020             | Negative   |
| C5785     | MOHD NAEEM SHAIKH 58           | 34        | М      | 29.05.2020             | Negative   |

Note: The results relate only to the specimens tested and should be correlated with clinical findings. Interpretation guidance:-

- Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/any other health care facility affirming requirements of the case definition/s.
- A positive test result is only tentative, and will be reconfirmed by retesting.
- Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease.
- The repeat specimens may be considered after a a gap of 2 4 days after the collection of the first specimen foradditional
  testing if required.\*
- A positive alternate pathogen does not necessarily ruleout either, as little is yet known about the role ofcoinfections.
- Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director General,ICMR
