Note: The results relate only to the specimens tested and should be correlated with clinical findings.
Interpretation guidance:-

- *Testing of referred clinical specimens was considered on the basis of request / referral received from / through State Surveillance Officer (SSO) of concerned State Integrated Disease Surveillance Programme (IDSP)/any other health care facility affirming requirements of the case definition/s.*
- *A positive test result is only tentative, and will be reconfirmed by retesting.*
- *Repeat sampling and testing of lower respiratory specimen is strongly recommended in severe or progressive disease.*
- *The repeat specimens may be considered after a a gap of 2 – 4 days after the collection of the first specimen foradditional testing if required.**
- *A positive alternate pathogen does not necessarily ruleout either, as little is yet known about the role ofcoinfections.*
- *Please note that these results are not to be used for any thesis or presentations or for Publication in any Journal without the prior permission of the Director General,ICMR*
